The Bad Bones Consciousness

For those of you who wish to ride on a higher plane, when the best the industry has to offer is just not good enough, Bad Bones has, and always will be dedicated to building the best products this industry has ever seen. This is our commitment to you, our customer. You are the reason for which we, at Bad Bones, exist.

Steve Dobernic, owner of Bad Bones, bike builder and designer, is fulfilling a dream with the success and satisfaction of seeing his ideas become reality. Always ahead of his time, in design and feel, Steve enjoys seeing the reaction and excitement of others as they capture and embrace his visions. Bad Bones is simply an extension of Steve, his dreams and attitude. The Bad Bones name exemplifies what the company and Steve are all about..... ATTITUDE.

Years of dreams, desires and fundamental application are the roots and "make up" of the new Bad Bones Custom Choppers (tm). 1960's in their "ILLEGAL" outlaw styling, the Bad Bones Custom brings back a vintage, not-to-be-forgotten, era in time with developmental focus on technological advancements common to the 21st century. Motor displacements up to 137 cubic inches equal power to weight ratios more than doubled for unequaled horsepower output. Tolle Adjustaglide front ends possess "Track and Trail" adjustments for optimum tracking, eliminating the inherent "flop" once associated with a chopped front end. Dual front calipers, four piston rear calipers, 18 x 5.750/180 rear tires, full rear shock travel, Fournale Shocks, 6.5 of stretch, rake is optional, flush mount rear axle adjusters, hand fitted top mount oil tanks, streamline 3.7 gallon flush mount fuel tanks, Billet electrical panel and no exposed wiring. Brake and oil lines are hand bent polished stainless hard lines for the ultimate in custom look and function. All topped off with the beauty and function of Bad Bones and Arlen Ness's Billet covers.

For those at the top, where the best is a standard by which we live; Bad Bones now presents to you in all its glory...

The Bad Bones Custom Choppers.(tm)

Thank you for... Believing in the Bones
